| | | February 2020 |
| Safety data sheet according to EU Reg. 1907/2006 as amended | | Supersedes May 2019 |

SAFETY DATA SHEET **EXIREL 100 SE**

Revision: Sections containing a revision or new information are marked with a .

♣ SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

EXIREL 100 SE 1.1. Product identifier

Contains 1,2-benzisothiazole-3(2H)-one

1.2. Relevant identified uses of the substance or mixture and uses

advised against Can be used as insecticide only.

1.3. Details of the supplier of the safety data sheet

FMC Agricultural Solutions A/S

Thyborønvej 78 DK-7673 Harboøre

Denmark

SDS.Ronland@fmc.com

1.4. Emergency telephone number

Medical emergencies:

Luxembourg: +352 8002 5500 Austria: +43 1 406 43 43 Netherlands: +31 30 274 88 88 Belgium: +32 70 245 245 Norway: +47 22 591300 Bulgaria: +359 2 9154 409 Poland: +48 22 619 66 54 Cyprus: 1401

SECTION 2: HAZARDS IDENTIFICATION

2.1. Classification of the substance or

mixture

Skin irritation: Category 2 (H315) Skin sensitisation: Category 1 (H317)

Hazards to the aquatic environment, acute: Category 1 (H400)

chronic: Category 1 (H410)

Health hazards The product has irritating properties and may cause allergic

sensitisation.

Environmental hazards The product is very toxic to aquatic organisms.

2.2. Label elements

According to EU Reg. 1272/2008 as amended

Product identifier Exirel 100 SE

Contains 1,2-benzisothiazole-3(2H)-one

Hazard pictograms (GHS07, GHS09)

Signal word Warning

Hazard statements

H315 Causes skin irritation.

H317 May cause an allergic skin reaction.

Supplementary hazard statement

instructions of use.

Precautionary statements

P261 Avoid breathing vapour or spray.
P264 Wash thoroughly after handling.

P280 Wear protective gloves.

or vPvB.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1. **Substances** The product is a mixture, not a substance.

SECTION 4: FIRST AID MEASURES

| 4.1. | Description of first aid measures Inhalation | If experiencing any discomfort, immediately remove from exposure. Light cases: Keep person under surveillance. Get medical attention immediately if symptoms develop. Serious cases: Get medical attention immediately or call for an ambulance. |
|------|--|--|
| | Skin contact | Immediately remove contaminated clothing and footwear. Flush skin with water. Wash with water and soap. See physician if any symptom develops. |
| | Eye contact | Immediately rinse eyes with much water or eyewash solution, occasionally opening eyelids, until no evidence of chemical remains. Remove contact lenses after a few minutes and rinse again. Get medical attention if irritation develops. |
| | Ingestion | Inducing vomiting is not recommended. Rinse mouth and drink water or milk. If vomiting does occur, rinse mouth and drink fluids again. Consult a physician immediately. |

Thyborønvej 78 DK-7673 Harboøre Denmark +45 9690 9690 www.fmc.com CVR No. DK 12 76 00 43

| Material group | - | Page 4 of 13 |
|----------------|---------------|---------------|
| Product name | EXIREL 100 SE | |
| | | February 2020 |

4.2. Most important symptoms and effects, both acute and delayed

Skin contact may cause irritation and allergic reactions.

4.3. Indication of any immediate medical attention and special treatment needed

Immediate medical attention is required in case of ingestion.

Notes to physician

A specific antidote against this substance is not known. Gastric lavage and/or administration of activated charcoal can be considered.

SECTION 5: FIRE-FIGHTING MEASURES

5.1. Extinguishing media

Dry chemical or carbon dioxide for small fires, water spray or foam for large fires. Avoid heavy hose streams.

5.2. Special hazards arising from the substance or mixture

The essential breakdown products are volatile, toxic, irritant and inflammable compounds such as nitrogen oxides, hydrogen chloride, hydrogen bromide, carbon monoxide, carbon dioxide and various chlorinated and brominated organic compounds. Traces of hydrogen cyanide may be present.

5.3. Advice for firefighters

Use water spray to keep fire-exposed containers cool. Approach fire from upwind to avoid hazardous vapours and toxic decomposition products. Fight fire from protected location or maximum possible distance. Dike area to prevent water runoff. Firemen should wear self-contained breathing apparatus and protective clothing.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

It is recommended to have a predetermined plan for the handling of spills. Empty, closable vessels for the collection of spills should be available.

In case of large spill (involving 10 tonnes of the product or more):

- 1. use personal protection equipment; see section 8
- 2. call emergency telephone no.; see section 1
- 3. alert authorities.

Observe all safety precautions when cleaning up spills. Use personal protection equipment. Depending on the magnitude of the spill this may mean wearing respirator, face mask or eye protection, chemical resistant clothing, gloves and boots.

Stop the source of the spill immediately if safe to do so. Avoid and reduce formation of vapour or mist as much as possible.

6.2. Environmental precautions

Contain the spill to prevent any further contamination of surface, soil or water. Wash waters must be prevented from entering surface water drains. Uncontrolled discharge into water courses must be alerted to the appropriate regulatory body.

Thyborønvej 78 DK-7673 Harboøre Denmark +45 9690 9690 www.fmc.com CVR No. DK 12 76 00 43

| Material group | 1 | Page 5 of 13 |
|----------------|---------------|---------------|
| Product name | EXIREL 100 SE | |
| | | February 2020 |

6.3. Methods and materials for containment and cleaning up

It is recommended to consider possibilities to prevent damaging effects of spills, such as bunding or capping. See GHS (Annex 4, Section 6).

If appropriate, surface water drains should be covered. Minor spills on the floor or other impervious surface should be absorbed onto an inert absorbent such as universal binder, Fuller's earth, bentonite or other absorbent clay. Transfer to suitable containers. Clean area with strong industrial detergent and much water. Absorb wash liquid onto suitable absorbent and transfer contaminated absorbent to suitable containers. The used containers should be properly closed and labelled.

Large spills which soak into the ground should be dug up and transferred to suitable containers.

Spills in water should be contained as much as possible by isolation of the contaminated water. The contaminated water must be collected and removed for treatment or disposal.

6.4. Reference to other sections

See subsection 8.2. for personal protection. See section 13 for disposal.

SECTION 7: HANDLING AND STORAGE

7.1. Precautions for safe handling

In an industrial environment, it is recommended to avoid all personal contact with the product, if possible by using closed systems with remote system control. The material should be handled by mechanical means as much as possible. Adequate ventilation or local exhaust ventilation is required. The exhaust gases should be filtered or treated otherwise. For personal protection in this situation, see section 8.

For its use as a pesticide, first look for precautions and personal protection measures on the officially approved label on the packaging or for other official guidance or policy in force. If these are lacking, see section 8.

Remove contaminated clothing immediately. Wash thoroughly after handling. Before removing gloves, wash them with water and soap. After work, take off all work clothes and footwear. Take a shower, using water and soap. Wear only clean clothes when leaving job. Wash protective clothing and protective equipment with water and soap after each use.

Do not discharge to the environment. Do not contaminate water when disposing of equipment wash waters. Collect all waste material and remains from cleaning equipment, etc., and dispose of as hazardous waste. See section 13 for disposal.

Thyborønvej 78 DK-7673 Harboøre Denmark +45 9690 9690 www.fmc.com CVR No. DK 12 76 00 43

| Material group | - | Page 6 of 13 |
|----------------|---------------|---------------|
| Product name | EXIREL 100 SE | |
| | | February 2020 |

7.2. Conditions for safe storage, including any incompatibilities The product is stable under normal conditions of warehouse storage at temperatures above 0°C.

Store in closed, labelled containers. The storage room should be constructed of incombustible material, closed, dry, ventilated and with impermeable floor, without access of unauthorised persons or children. The room should only be used for storage of chemicals. Food, drink, feed and seed should not be present. A hand wash station

should be available.

7.3. **Specific end use(s)**

The product is a registered pesticide which may only be used for the applications it is registered for, in accordance with a label approved by the regulatory authorities.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

| 8.1. | Control | parameters |
|------|---------|------------|
|------|---------|------------|

Personal exposure limits To our knowledge not established for cyanantraniliprole.

> However, other personal exposure limits defined by local regulations may exist and must be observed.

Cyantraniliprole

8.2. Exposure controls

DNEL Not established

The EFSA has established an AOEL of 0.01 mg/kg bw/day

PNEC, aquatic environment $1 \mu g/1$

When used in a closed system, personal protection equipment will not be required. The following is meant for other situations, when the use of a closed system is not possible, or when it is necessary to open the

system. Consider the need to render equipment or piping systems non-

hazardous before opening.

The precautions mentioned below are primarily meant for handling of the undiluted product and for preparing the spray solution, but can be

recommended for spraying as well.

Respiratory protection

The product does not automatically present an airborne exposure concern when handled carefully, but in the event of an accidental discharge of the material which produces a heavy vapour or mist, workers must put on officially approved respiratory protection equipment with a universal filter type including particle filter.

Protective gloves

Wear chemical resistant gloves, such as barrier laminate, butyl rubber or nitrile rubber. The breakthrough times of these materials for the product are unknown, but it is expected that they will give adequate

protection.

Thyborønvej 78 DK-7673 Harboøre Denmark

+45 9690 9690 www.fmc.com

CVR No. DK 12 76 00 43

| Material group | - | Page 7 of 13 |
|----------------|---------------|---------------|
| Product name | EXIREL 100 SE | |
| | | February 2020 |

Eye protection Wear safety glasses. It is recommended to have an eye wash fountain

immediately available in the workplace when there is a potential for

eye contact.

Other skin protection

Wear appropriate chemical resistant clothing to prevent skin contact depending on the extent of exposure. During most normal work situations where exposure to the material cannot be avoided for a limited time span, waterproof pants and apron of chemical resistant material or coveralls of polyethylene (PE) will be sufficient. Coveralls of PE must be discarded after use if contaminated. In cases of excessive or prolonged exposure, coveralls of barrier laminate may be required.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1. **Information on physical and** chemical properties

Appearance Off-white liquid
Odour Mild, phenol-like
Odour threshold Not determined

Upper/ lower flammability or

explosive limits Not determined

estimated to 5.13 x 10⁻¹⁵ Pa at 20°C

Vapour density Not determined

Relative density 0.982

acetone 6.54 g/l hexane 0.067 mg/l water 17.43 mg/l at a

vater 17.43 mg/l at pH 4 12.33 mg/l at pH 7

5.94 mg/l at pH 9

Partition coefficient n-octanol/water Cyantraniliprole : $\log K_{ow} = 1.97$ at pH 4 and 22°C

 $log K_{ow} = 2.07$ at pH 7 and 22°C $log K_{ow} = 1.74$ at pH 9 and 22°C

Decomposition temperature Not determined

9.2. Other information

Miscibility The product is dispersible in water.

Thyborønvej 78 DK-7673 Harboøre Denmark +45 9690 9690 www.fmc.com

SECTION 11: TOXICOLOGICAL INFORMATION

10.6. Hazardous decomposition products

| 11.1. | . Information on toxicological effects | | * = Based on available data, the classification criteria are not met. |
|-------|--|--------------|--|
| | <u>Product</u> | | |
| | Acute toxicity | | The product is not harmful by inhalation, in contact with skin or if swallowed. * However, it should always be treated with the usual care of handling chemicals. The acute toxicity is measured as: |
| | Route(s) of entry | - ingestion | LD_{50} , oral, rat: > 5000 mg/kg (method OECD 425) |
| | | - skin | LD_{50} , dermal, rat: > 5000 mg/kg (method OECD 402) |
| | | - inhalation | LC_{50} , inhalation, rat: > 2.4 mg/l/4 h (method OECD 403) |
| | Serious eye damage/irritation Respiratory or skin sensitisation Germ cell mutagenicity Carcinogenicity Reproductive toxicity STOT – single exposure | | Irritating to skin (method OECD 404) |
| | | | Not irritating to eyes (method OECD 405). * |
| | | | Skin sensitizer (method OECD 406). |
| | | | The product contains no ingredients known to be mutagenic. * |
| | | | The product contains no ingredients known to be carcinogenic. * |
| | | | The product contains no ingredients found to have adverse effects on reproduction. * |
| | | | To our knowledge, no specific effects have been observed after single exposure. * |
| | | | The following has been measured on the active ingredient cyantraniliprole: |

Target organ: liver

protein levels were found. *

NOAEL: > 1000 mg/kg bw/day in a 28-day oral rat study (method OECD 407). At this exposure, increased liver weight and altered

FMC Agricultural Solutions A/S Thyborønvej 78

Thyborønvej 78 DK-7673 Harboøre Denmark +45 9690 9690

| Material group | 1 | Page 9 of 13 |
|----------------|---------------|---------------|
| Product name | EXIREL 100 SE | |
| | | February 2020 |

| Aspiration hazards | | The product contains no ingredients known to present an aspiration pneumonia hazard. * | | |
|---|-------------------|---|--|--|
| Symptoms and effect delayed | | Skin contact may cause irritation and allergic reactions. | | |
| <u>Cyantraniliprole</u> Toxicokinetics, metabolism and distribution | | Cyantraniliprole is rapidly absorbed after oral intake and widely distributed in the body with highest concentrations found on liver and kidney. It is extensively metabolised. Excretion is rapid, within a few days. No indication of bioaccumulation is found. | | |
| Acute toxicity | | The substance is not harmful by inhalation, in contact with skin or if swallowed. * However, it should always be treated with the usual care of handling chemicals. The acute toxicity is measured as: | | |
| Route(s) of entry | - ingestion | LD_{50} , oral, rat: > 5000 mg/kg (method OECD 425) | | |
| | - skin | LD_{50} , dermal, rat: > 5000 mg/kg (method OECD 402) | | |
| | - inhalation | LC_{50} , inhalation, rat: > 5.2 mg/l/4 h (method OECD 403) | | |
| Skin corrosion/irritat | ion | Not irritating to skin (method OECD 404). * | | |
| Serious eye damage/ | irritation | May be mildly irritating to eyes (method OECD 405). * | | |
| Respiratory or skin sensitisation | | Not a skin sensitizer (methods OECD 406 and 429). * | | |
| Benzenesulfonic ac | rid, 4-C10-13-sed | c-alkyl derivs., calcium salts | | |
| Acute toxicity | | The substance is not considered as harmful by skin contact, ingestion or inhalation. * | | |
| Route(s) of entry | - ingestion | LD ₅₀ , oral, rat: not available | | |
| | - skin | LD ₅₀ , dermal, rat: not available | | |
| - inhalation | | LC ₅₀ , inhalation, rat: not available | | |
| Skin corrosion/irritat | ion | Irritating to skin. | | |
| Serious eye damage/ | irritation | Irritating to eyes with the potential to cause permanent eye damage. | | |
| 1,2-Benzisothiazol- | -3(2H)-one | | | |
| Acute toxicity | | The substance is harmful by ingestion. | | |
| Route(s) of entry - ingestion | | LD ₅₀ , oral, rat (male): 670 mg/kg | | |
| | | LD ₅₀ , oral, rat (female): 784 mg/kg (method OPPTS 870.1100, measured on 73% solution) | | |
| - skin | | LD_{50} , dermal, rat: > 2000 mg/kg * (method OPPTS 870.1200, measured on 73% solution) | | |

LC₅₀, inhalation, rat: not available

- inhalation

Skin corrosion/irritation Slightly irritating to skin (method OPPTS 870.2500). Serious eye damage/irritation Severely irritating to eyes (method OPPTS 870.2400). Moderate dermal sensitizer to guinea pigs (method OPPTS 870.2600). Respiratory or skin sensitisation ... The substance appears to be significantly more sensitising to humans. **♣ SECTION 12: ECOLOGICAL INFORMATION** The product is very toxic to aquatic invertebrates and toxic to algae. It 12.1. **Toxicity** is not considered as harmful to fish, birds, insects and soil macro- and microorganisms. The ecotoxicity of the product is measured as: - Fish 96-h LC₅₀: 130 mg/l Common carp (Cyprinus carpio) 48-h EC₅₀: 0.232 mg/l - Invertebrates Daphnids (Daphnia magna) 72-h E_rC₅₀: 3.39 mg/l - Algae Green algae (Pseudokirchneriella subcapitata) ... The following has been measured on the active ingredient **cyantraniliprole**: - Fish 28-day NOEC: 2.9 mg/l Sheepshead minnow (Cyprinodon variegatus) - Invertebrates 21-day NOEC: 0.0656 mg/l Daphnids (Daphnia magna) - Insects Bees (Apis mellifera) 48-h LD₅₀, contact: $> 0.0934 \mu g/bee$ 48-h LD₅₀, oral: $> 0.1055 \mu g/bee$ 12.2. Persistence and degradability Cyantraniliprole is not readily biodegradable. Primary degradation half-lives vary with circumstances, from a few to several weeks in aerobic water and soil. The product contains minor amounts of not readily biodegradable ingredients, which may not be degradable in waste water treatment plants. 12.3. **Bioaccumulative potential** See section 9 for n-octanol/water partition coefficients. Bioaccumulation of **cyantraniliprole** is not expected. 12.4. **Mobility in soil** Cyantraniliprole is not mobile in soil. Results of PBT and vPvB 12.5. assessment None of the ingredients meets the criteria for being PBT or vPvB. 12.6. Other adverse effects Other relevant hazardous effects in the environment are not known.

SECTION 13: DISPOSAL CONSIDERATIONS

13.1. **Waste treatment methods** Remaining quantities of the material and empty but unclean packaging should be regarded as hazardous waste.

Thyborønvej 78 DK-7673 Harboøre Denmark +45 9690 9690 www.fmc.com CVR No. DK 12 76 00 43

| Material group | - | Page 11 of 13 |
|----------------|---------------|---------------|
| Product name | EXIREL 100 SE | |
| | | February 2020 |

Disposal of waste and packagings must always be in accordance with all applicable local regulations. According to the Waste Framework Directive (2008/98/EC), Disposal of product possibilities for reuse or reprocessing should first be considered. If this is not possible, the material can be disposed of by removal to a licensed chemical destruction plant or by controlled incineration with flue gas scrubbing. Disposal of packaging Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Do not discharge to sewer systems. It is recommended to consider possible ways of disposal in the following order: 1. Reuse or recycling should first be considered. Reuse is prohibited except by the authorisation holder. If offered for recycling, containers must be emptied and triply rinsed (or equivalent). Do not discharge rinsing water to sewer systems. 2. Controlled incineration with flue gas scrubbing is possible for combustible packaging materials. 3. Delivery of the packaging to a licensed service for disposal of hazardous waste. 4. Disposal in a landfill or burning in open air should only occur as a last resort. For disposal in a landfill, containers should be emptied completely, rinsed and punctured to make them unusable for other purposes. If burned, stay out of smoke.

SECTION 14: TRANSPORT INFORMATION
